

ALWAYS ON

Protect your investment every time with AgriShield® seed treatments.

Successful seasons start with quality seed treated to control diseases and insects. AgriShield® seed treatments help soybean plants more effectively take root and fulfill their genetic potential.

Options translate to opportunities.

AgriShield® PLUS

This powerful combination of fungicide and insecticide chemistries delivers enhanced plant vigor, as well as protection from a wide variety of above and below-ground insects, plus defense against major seedborne and soilborne diseases. AgriShield® Plus promotes emergence and helps protect your seed investment.

TARGETED INSECTS:

- Aphid
- Bean Leaf Beetle
- Grape Colaspis
- Leafhopper
- Seedcorn Maggot
- Thrips
- White Grub
- Wireworm

TARGETED DISEASES:

- Early-Season Phytophthora
- Pythium
- Rhizoctonia
- Fusarium
- White Mold or Seedborne Sclerotinia
- Seedborne Phomopsis

AgriShield® MAX

This combination of fungicide and insecticide chemistries maximizes enhanced plant vigor, as well as protection from a wide variety of above and below-ground insects, plus defense against major seedborne and soilborne diseases. AgriShield® Max promotes emergence and protects your seed investment. A 200-plus day inoculant helps to increase nodule development, providing more opportunity for additional nitrogen fixation, which increases the probability of improved yields.

TARGETED INSECTS:

- Aphid
- Bean Leaf Beetle
- Grape Colaspis
- Leafhopper
- Seedcorn Maggot
- Thrips
- White Grub
- Wireworm

TARGETED DISEASES:

- Early-Season Phytophthora
- Pythium
- Rhizoctonia
- Fusarium
- White Mold or Seedborne Sclerotinia
- Seedborne Phomopsis

AgriShield® MAX with Saltro

This treatment enhances your yield potential by maximizing your protection against all major insects and diseases, including two of the most significant contributors to soybean yield losses: sudden death syndrome (SDS) and nematodes. AgriShield® Max w/ Saltro® combines fungicide, insecticide and a 200-plus day inoculant that helps increase nodule development, providing more opportunity for additional nitrogen fixation. Saltro® is the latest technology advancement that protects the root system by providing superior protection against SDS (Fusarium virguliforme) and nematodes while reducing stress on the plant.

TARGETED INSECTS:

- Aphid
- Bean Leaf Beetle
- Grape Colaspis
- Leafhopper
- Seedcorn Maggot
- Thrips
- White Grub
- Wireworm
- Multiple Nematode Species

TARGETED DISEASES:

- Early-Season Phytophthora
- Pythium
- Rhizoctonia
- Fusarium
- White Mold or Seedborne Sclerotinia
- Seedborne Phomopsis

Seed protection doesn't get more powerful than this.
